## THE WANT AD SEES MORE PEOPLE IN ONE DAY THAN YOU CAN SEE IN A MONTH

### New Mexico Mining News

**Mogollon.**  
 Three shifts are at work driving in the No. 2 tunnel at the Gold Dust mine. This tunnel is 465 feet lower than No. 1 tunnel, where an ore shoot 230 feet long has been developed.

The Mogollon Gold and Copper company is making shipping ore at the Little Charlie and Conroy mines. An average of 60 tons per day is being hauled to the mill from the property of the Treasure Mining and Reduction company. A wire rope tramway will be installed at an early date, thus effecting a saving of \$1.50 per ton in transportation expense. When the tramway is built, the capacity of the mill will be doubled. The development in the lower levels continues in good ore.

**Orogrande.**  
 W. B. Bates has taken an option on the Escobedo Mining and Development company property in that district. He is working what is known as the old Mexican mine. He went to work in an old shaft, from the bottom of which was run an old drift about 25 feet long. After crosscutting to the east through the porphyry wall rock, only 15 inches, he broke into a body of ore continuing the crosscut. He now has a body of ore more than 12 feet wide, with no wall in sight. Assays show values in silver and lead of \$15 per ton, and as the work progresses the value continues to improve. Mr. Bates is making arrangements to equip the property with modern machinery. His

**DO YOU LIKE BREAD?**  
 Most people do. That is, really good, reliable bread. Bread that is white and sweet, with that luscious, nutty flavor so delightful to the taste. Bread that is thoroughly healthy, digestible and valuable for its nutritious qualities. If so, then order a loaf of Cream Bread served at your table. You soon will regard it as an old and steadfast friend, when it comes from the

**Kent.**  
 The Dona Dora Mining company, George S. Courtney general manager, is purchasing machinery to equip its mine. When the machinery is installed work will be resumed with a full force of men. The company is said to be clear of all indebtedness. The ore contains copper, gold, silver and lead, and gold value runs from \$4.50 to \$50 a ton. The silver and lead together average in value \$87 a ton. The company has recently reorganized under different management and intends to prosecute work in a practical manner.

**Las Vegas.**  
 The Romero Mining company of Las Vegas has been incorporated with a capital of \$250,000, and the following stockholders and directors: Margarito Romero, C. C. Robbins, J. M. Cunningham, T. W. Hayward, W. C. Hayden, H. C. Smith and H. C. de Baca, all of Las Vegas.

**Santa Fe.**  
 Incorporation papers have been filed by the Minnesota-Santa Fe Mining company, capitalized at \$1,000,000, and with William W. Ingalls as statutory agent. The capitalization is \$1,000,000, and the incorporators and directors are: H. M. Farman, Minneapolis; A. B. Gracoff, and J. A. Calkins, Santa Fe.

**Siera.**  
 A five-foot body of ore was brought to light in an upraise on the 500-foot level of the Snake mine last week. The ore can be traced 200 feet along the level. One huge block of ore the weight of which is estimated to be ten tons, has been disclosed. Assays from the ore gave returns of over six and a half ounces gold and eighteen ounces silver to the ton. Mr. Moffett is very much pleased over the showing of ore he now has in sight and predicts a bright future for the mine. A few days ago some evil-minded person or persons went to the pump station of the Statehood Mines company and with a pick dug carrying to the ground to the extent of \$250. Fortunately, however, Manager Moffett had the necessary material on hand to make immediate repairs and was not long in putting the pump in thorough working order.

**Lincoln.**  
 John H. McCutcheon, the owner and general manager of several mining properties in the Gallinas mountains, Lincoln county, states that he is working on ore all the time, and that the ore is lead-silver, carrying some copper. The lead is carbonate, and was struck at a depth of 75 feet. Also that C. M. Ryan and Tom DuBois are developing a very promising prospect on the west side of the Gallinas mountains, a lead sulphide and fluor spar carrying values in both gold and silver. Ryan Bros. have completed assessment work on the Cash Entry group. This work was done in a tunnel for the purpose of getting the vein exposed in a shaft above. The vein in the breast of the tunnel is small at present but is all in high grade copper. Parties are working on what is known as the Jenkins iron property, the effort being to develop tonnage. All the iron of this district has been shown to be of high grade Bessemer, and they are now engaged in determining the extent. Several hundred thousand tons have been developed on the Jenkins holdings.

**San Juan.**  
 An important turquoise discovery was reported from the foothills of the Ute mountains on the Ute reservation on the New Mexico-Colorado boundary.

shaft has reached a depth of 97 feet, and he is prepared to begin shipments.

**San Juan.**  
 An important turquoise discovery was reported from the foothills of the Ute mountains on the Ute reservation on the New Mexico-Colorado boundary.

J. W. Kniffon is buying machinery for a cyanide plant of a daily capacity of fifty tons for the Blackley property at Steeple Rock, Grant county, N. M. The company now owning this property is the American Exploration and Mining company, which has been developing it for the last two years and has sufficient ore in sight to justify an increase of the plant. The property is situated fifteen miles from Sheldon, a railroad station in Arizona on the New Mexico and Arizona railroad. The machinery is being bought in El Paso, and it is expected that other properties having bodies of low grade ore will follow the example of this company in the near future. Mr. Kniffon also states that the last chance mine in that camp has recently installed oil engines throughout its plant, and that the mine is in excellent shape.

### HELP WANTED--Male.

**SALESMAN WANTED**—Higher class or better paying employment than that of representing a leading nursery company is not to be had. If you are ambitious to better your condition, the opportunity lies before you in entering our employ. Salem Nursery company, Salem, Oregon. 11-10-c
